

### **"Ethiopian kids in Atlanta For Ethiopian kids with a heart disease in Ethiopia"**

We are a group of Ethiopian youth who live in Atlanta and attend Ethiopian Evangelical church. We learned from <http://cfethiopia.org> and Atlanta representative of CFE that thousands of Ethiopian children are dying as a result of heart diseases that could have been treated at an early age. This year we heard that an Ethiopian girl came to Atlanta for heart surgery died after having the surgery. Her life could have been saved if the surgery was done at an earlier age. Unfortunately, we don't have a hospital or the trained manpower to deal with this kind of surgery in Ethiopia. The people of our country are in the process of building a cardiac center in Ethiopia. The good news is that there is only 30% or \$500,000 cost remaining to finish the Hospital. These funds can be raised if we join hands with our parents and Ethiopians at large everywhere in the world. This is a noble cause equivalent to pulling a child from a burning house.

We along with Ethiopian students of Tucker High School invite all kids to get involved in helping with this noble cause by donating our candy money or organizing car wash or sale tee shirt in their area of residence as we do here in Atlanta.

"Hey! Mom and Dad, we ask you to give us your heart, not for a transplant but to open your wallet and purses to save a child" Thanks a million!!!

***Let us join hands to save a child with heart disease in Ethiopia!***

This Fund raising is dedicated in "Memory of Hussnia Redone" a girl that came for a heart surgery from Ethiopia and died this year in Atlanta after a heart surgery.
